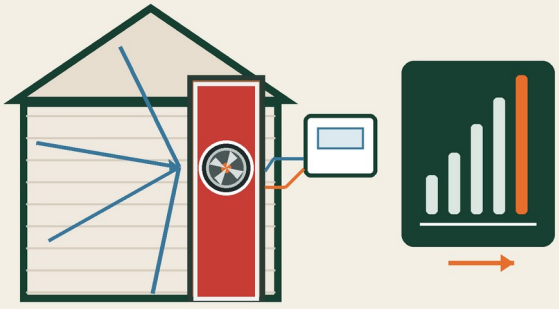
ENERGY-EFFICIENCY SUPPORT FOR HOME FLIPPERS & INVESTORS

UNDERSTAND THE HOUSE BEFORE YOU SET THE SCOPE.

Green Platoon combines building-performance diagnostics, blower-door testing, building science and Ameren Illinois program knowledge to help investors make informed rehab decisions.

Bring us in before insulation, air sealing, ventilation or other envelope work begins.



BUILDING PERFORMANCE, MEASURED.

A blower-door test helps measure air leakage through the building envelope and establish a baseline for how the house is performing.

THE HOUSE WORKS AS A SYSTEM

AIR • HEAT • MOISTURE
INSULATION • PRESSURE • VENTILATION

We use measured conditions and building-science principles to help identify where attention may be needed before the rehab scope is finalized.

MEASURE → IMPROVE → VERIFY

You know rehabs. We know building performance. Let's put the two together.

AMEREN INCENTIVES MAY HELP OFFSET QUALIFYING WORK.

Green Platoon is an Ameren Illinois Program Ally Contractor. For eligible properties and measures, current program incentives may help reduce the cost of qualifying insulation, air sealing, ventilation and other energy-efficiency improvements.

The opportunity depends on the property, existing conditions, planned work and current program requirements. We review those factors before recommending a path forward.

ATTIC | WALLS | RIM JOIST | CRAWL SPACE | AIR SEALING | VENTILATION

WHEN SHOULD YOU CALL GREEN PLATOON?

BEFORE INSULATION
Attic, wall, crawl-space or rim-joist work.

BEFORE MAJOR AIR SEALING
Envelope penetrations, weatherization or major sealing.

WHEN COMFORT IS OFF
Drafts, uneven temperatures or stubborn rooms.

BEFORE AREAS ARE CLOSED
While key areas remain accessible and the scope can change.

WHAT THE DIAGNOSTIC PROCESS GIVES YOU

- **BASELINE** Measured starting point where applicable.
- **PRIORITIES** What deserves attention first.
- **PRACTICAL SCOPE** Recommendations based on conditions.
- **PROGRAM DIRECTION** Ameren paths worth considering.
- **VERIFICATION** Before-and-after comparison when applicable.

ESPECIALLY USEFUL FOR: Older homes • Unknown insulation • Drafty properties • Major envelope rehabs • Comfort complaints • Open-wall renovations

HOW WE FIT INTO THE REHAB

ASSESS → DIAGNOSE → BUILD THE SCOPE → VERIFY

ASSESS
Property, rehab stage, planned work and concerns.

DIAGNOSE
Appropriate building-performance testing.

BUILD THE SCOPE
Prioritized work and program opportunities.

VERIFY
Post-work performance where appropriate.

BRING US IN EARLY.

Some qualifying Ameren Illinois measures require assessment, documentation or approval before work begins.

A quick review before insulation or air-sealing work starts can preserve more options - and lets us evaluate the building while important areas are still accessible.

HAVE A PROPERTY UNDER REHAB?

SEND US THE ADDRESS AND LET'S TAKE A LOOK.

PROPERTY ADDRESS • REHAB STAGE • PLANNED IMPROVEMENTS

Green Platoon can help determine whether diagnostics, building-performance improvements or current Ameren Illinois opportunities are worth considering before the next phase begins.

Eligibility, measures, project requirements and availability are determined under current Ameren Illinois Energy Efficiency Program rules. Green Platoon is an independent Program Ally Contractor and is not Ameren Illinois.
